A342 and A345 Master Links

Larger Forged Sizes!

The 2" through 4" A342 master links, and the primary link on all the A345 master link assembly product line are now forged.

In addition to the standard features of all Crosby® A342 and A345 links, the larger size forgings, like the smaller sizes, now contain the following markings in easy to read "raised letters".

- Product Identification Code (PIC) for material traceability
- Size
- QUIC-CHECK® Markings
 - Deformation Indicators
 - Angle Indicators
- Crosby
- USA
